GUIDE | PRO SCALE ADVANCED LIGHTING CONTROL SYSTEM

6591

The Traxxas Pro Scale Advanced Lighting Control System provides full-featured scale functionality with plug and play simplicity. Utilizing two innovative new modules, this system provides fully functional brake lights, tail lights, reverse lights, turn signals, and high/low beam lighting in a rugged, waterproof system built for the real world. Each model requires a specific installation kit and a compatible light kit (listed below, each sold separately).
